Sir:

AMENDMENTS

In the Claims (Clean Version of the Claims):

- 1. An audible confirmation system in an Intelligent Network for allowing a calling party to audibly hear an audible name of a call recipient, the audible confirmation system comprising:
 - a.. a database configured for storing a plurality of text names wherein each of the plurality of text names is associated with a unique identifier;
 - b. a control point coupled to the database and configured to retrieve one of the plurality of text names in response to a call initiated by the calling party directed to the unique identifier; and
 - c. a text to speech converter coupled to the control point and configured to convert

 $\begin{array}{c} & \underline{PATENT} \\ Attorney\ Docket\ No.:\ AVALUC-00401 \end{array}$

the selected one of the plurality of text names into the audible name.
